We solve these challenges

- Today, elections are also moving to the web
- For online elections to work, both the voting and the complex organizational processes leading up to and following the election must be digitalized.
- The running of the election must be uncomplicated and smooth.
- The tool must be usable without any barriers
- Elections must be data protection compliant and secure
- Users expect data to be stored and processed in Germany
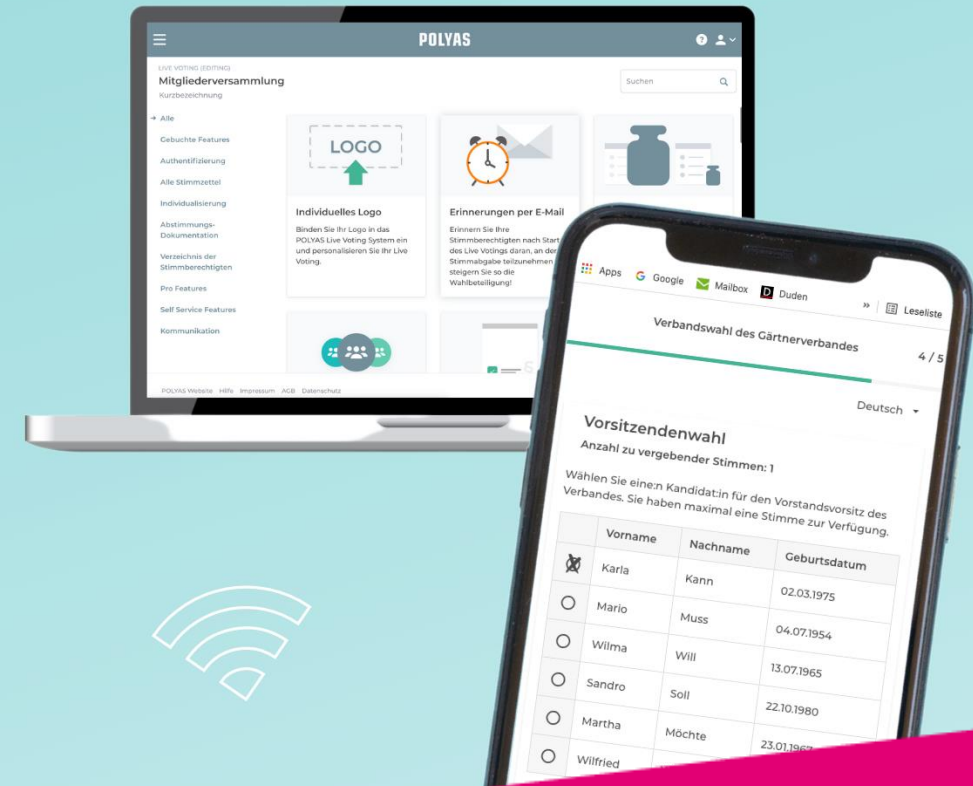

This is what our solution looks like

- We provide a digital platform for the simple running of online elections
- We map all processes digitally – securely, intuitively, barrier-free
- With our SaaS offering from the Open Telekom Cloud, we enable elections at any time and from anywhere and, thanks to the flexible resources, can also cope with high access numbers

Our advantages with the Open Telekom Cloud

- Highest level of security and availability
- Stability and reliability
- A solution "Made in Germany" with strict data protection standards
- Efficient work and development processes thanks to the Cloud Container Engine
- Intensive exchange with a dedicated contact person from the provider

"The future of elections is digital and POLYAS is paving the way."

Georg Müller, Head of Development & Support POLYAS GmbH
